

**STRIKE GOOD GAS FLOW**

Drillers of Well in Madison County Hope to Find Oil.

Special to the Gazette. *1922*  
Berryville, Feb. 18.—A small gas well has been brought in by the War Eagle Oil and Gas Company on War Eagle river, about 10 miles south of Huntsville. The well is in the southwest of the southeast of 13-15-26. Drilling operations were in charge of William S. Sterrett, former Oklahoma driller.

At a depth of 65 feet the drillers are said to have encountered a small flow of gas. This flow has steadily increased, it is said, and the hole now is down about 500 feet, with a flow sufficient to supply a small town.

Besides the gas, a seepage of oil also has been found in the well, according to the drillers.

The War Eagle company has about 8,000 acres under lease in this section, and expects to sink several additional test wells.

**SHOWING IN CARROLL**

Leases Jump From \$5 to \$150 Per Acre.

Special to the Gazette.  
Eureka Springs, Dec. 12.—Oil leases adjoining the site of the test of the Sure Pop Oil Company in this county have advanced from \$5 to \$150 per acre as a result of a favorable showing at the test. The well now is down 900 feet and there is a strong gas pressure.

**ONE WELL IN CARROLL**

Oklahomans Making Test on Land 1924 Drilled Ten Years Ago.

Special to the Gazette. *News*  
Berryville, Ark.—The only well now being drilled for oil or gas in Carroll county is located in the northeast quarter of 28, 18 N, 24 W, on the George Doak farm, 15 miles south of Berryville.

This enterprise was promoted by W. S. Sterrett of Oklahoma City, who is in active charge of all details. The financing is by J. M. Crook and others of Oklahoma City.

The well is now about 100 feet deep. The owners have about 14,000 acres under lease.

Some 10 years ago the late Maj. E. S. W. Drought, a Kansas City promoter, took several hundred acres of leases at Green Forest and vicinity and put down a well 2,600 feet deep. It was later abandoned.
